THE TEST CLINIC (UK)

'We only wished we had done these tests a long time ago. These tests are the way forward and we will definitely use them again on our other horses.'

B Martindale, UK

I thought that (..... Feed) was digestible and safe for all horses enlightening to discover that it didn't suit my particular horse!'

M Easton, UK

'The test was simple and convenient for me as an owner ... I followed the report and the results were game changing.'

G Tift, UK

TEST KIT CONTENTS

Equine FEED COMPATIBILITY TEST

Is your horse on the
right feed?

Testing over 50 feeds from popular brands

INTRODUCING THE WORLD'S FIRST EQUINE FEED COMPATIBILITY TEST

Even the best feeds do not suit every horse. Digestive stress, behavioural changes and inconsistent condition can all be influenced by subtle feed mismatches.

Using your horses DNA sample (hair & saliva), you can now have your horse tested against the most commonly used feeds for general/leisure horses.

The results will show you which feeds appear **compatible** with your horse, which may cause **mild stress** and which are **best avoided**.

Testing over 50 Feed & supplement items from famous brands

No more guessing, make informed choices

TESTING FEEDS RELEVANT TO EVERYDAY HORSES INCLUDING:

- Leisure horses
- Riding school horses
- Sensitive horses
- Horses with behavioural or digestive concerns

SIGNS OF POTENTIAL FEED INCOMPATIBILITY CAN INCLUDE:

- Ulcers, Colic
- Behavioural changes
- Weight fluctuations
- Low Energy
- Unexplained discomfort
- Sensitive or reactive
- On multiple feeds

EASY TO INTERPRET RESULTS:

Every item tested shows one of three responses, making it easy to understand:

Feed Brand	Result
Baileys No.2 Working Cubes	● ● ●
Dodson & Horrell Fibre Fusion	● ● ●
British Horse Feeds Speedi Beet	● ● ●
Saracen Essential Balancer	● ● ●

for illustration purposes only

- Green **Compatible Feeds**
Feeds that appear to respond to well
- Yellow **Limited Compatibility**
Feeds that may cause mild stress
- Red **Not Recommended**
Feeds showing strong energetic mismatch

SIMPLE THREE STEP PROCESS:

- 1) Order your test kit online.
- 2) Send DNA sample's back to laboratory.
- 3) Receive results in ten days.

WHY USE THIS TEST?

Is the Problem in the Feed?

Identify which feeds suit your horse's system and which feeds may cause discomfort.

Stop Wasting Money

Save money and time on guessing. Reduce your 'trial and error' approach.

Preventive Measures

A proactive way to maintain equine digestive health. Reduce unnecessary strain and burden on your horse.

Non-Invasive

A stress-free and straightforward testing process for your horse.

Actionable Results:

Easy to understand report showing low, medium or high risk analysis of certain feeds. Results can be followed through with diet adjustment.
